Eligibility criteria for co-enrolling in ANSC101/103 and ANSC211:

1. Complete BSCI105 with a grade of “C-” or better.

2. Take at least one other lab science course (CHEM131/132, BSCI106, etc) and earn a grade of “C-” or better in all lab science courses you complete.

*You MUST meet both of these conditions, AND be in good academic standing (not on academic probation) or you will not be eligible to be considered to co-enroll in ANSC101/103 and ANSC211.*

Eligibility criteria for co-enrolling in ANSC103 and ANSC211 (Students who take ANSC101 in the spring semester):

We offer a section of ANSC101 in the spring semester, but not ANSC103. To be able to co-enroll in ANSC103 and ANSC211 in the fall semester, students must have also already completed BSCI105. As BSCI105 is a required prerequisite for ANSC211, it must be completed prior to registering in ANSC211. So if you take ANSC101 in the spring, you must:

1. Successfully complete ANSC101

2. Have successfully completed BSCI105 with a grade of “C-” or better prior to the semester you will take ANSC211.

*You MUST meet both of these conditions, AND be in good academic standing (not on academic probation) or you will not be eligible to be considered to co-enroll in ANSC103 and ANSC211.*

*Students who do not meet the conditions listed above will not be considered eligible to co-enroll in the courses described above. Please note that this co-enrollment permission is for THESE COURSES only. All other prerequisites must be taken in their designated order.*
